

Fast-Track Flooring **Accelera**[®]

- *Fast curing to reduce downtime*
- *Low odor allows installation anytime*
- *High-performing decorative options*

Dur-A-Flex's Accelera flooring systems offer a unique combination of fast installation and high performance designed to meet the needs of today's 24/7 operations. Its innovative chemistry allows Accelera to deliver the same high performance features as traditional seamless flooring, but without the lengthy installation process and odor.

Seamless resinous flooring has long been the perfect solution for many applications offering excellent chemical and stain resistance, outstanding wear characteristics and minimal maintenance. However, traditional systems offer longer cure times and odor that can make installations in 24 hour, 7 day a week operations nearly impossible. Accelera flooring systems are designed specifically for application in these non-stop facilities.

Accelera™ flooring systems are available in decorative options including standard and custom vinyl and quartz blends.
